

Machine Learning Internship Curriculum

Introduction to Machine Learning

Core concepts, types, and real-world use cases

Data Preprocessing

Handling missing values, encoding, normalization, and feature selection

Machine Learning

Supervised, Unsupervised, and Reinforcement Learning algorithms

Deep Learning

Neural Networks, CNNs, RNNs, and model training techniques

Computer Vision

Image classification, object detection, and segmentation

Natural Language Processing (NLP)

Text cleaning, tokenization, sentiment analysis, and classification

Large Language Models (LLMs)

Basics of transformers, fine-tuning, and practical applications

Projects

Hands-on projects included for each topic to build real-world experience
